# Cropping Bacterial Test Strips from images

In the assignment, your task is to crop the bacterial test strips (white part including purple stains) from images using an automated algorithm. The data is provided in the folder.

Requirements
1. Develop your algorithm in any language you're comfortable with. (Python is highly recommended)
2. Create a document or jupyter notebook to explain the steps. Display images at each step of your algorithm.
3. Mention all the references used clearly.
